

ClaroRead Product Matrix

ClaroRead Standard 2007 UK

ClaroRead has been developed to help PC users of all capabilities create, read, view and check text. The software is closely integrated with Microsoft™ applications, with particular emphasis on Microsoft Word®.

Make your PC Speak with a Human Voice

ClaroRead speaks back text as it is typed, allowing a student to check and proof-read their work quickly and easily. Text can be spoken at any point by highlighting individual sections of text and pressing Play - great for proofreading.

Close integration with Microsoft Word 2003 and 2007, and Internet Explorer 6 and 7 means you can click and play at any point in a document or web page.

A choice of male (RealSpeak Daniel) and female (Emily and Jane) human-sounding voices give clarity and dispense with the robotic quality of most computer voices.

Spoken words can be tracked using a custom colour selection. Any accessible text under the mouse can be spoken if needed.

ClaroRead PLUS 2007 UK

ClaroRead has been developed to help PC users of all capabilities create, read, view and check text. The software is closely integrated with Microsoft™ applications, with particular emphasis on Microsoft Word®.

A choice of male (RealSpeak Daniel) and female (Emily and Jane) human-sounding voices give clarity and dispense with the robotic quality of most computer voices.

The addition of the Indian English voice Sangeeta in ClaroRead PLUS 2007 gives another elegant listening option for all users.

ClaroRead Standard 2007 UK

ClaroRead PLUS 2007 UK

Make Audio files from text documents for listening to on your PC or a portable audio player. Simply Select and Save - great for revision or listening on the move. Audio quality has been further improved for 2007.

A Text to Speech Pronunciation Dictionary is available to modify the way words are pronounced if needed.

Integration with Microsoft Word 2003 & 2007

ClaroRead provides a single tool bar for use in Microsoft Word that combines a homophone and tricky word dictionary, font and spacing commands, a thesaurus, spell checker button and a save to audio function. All have clear graphic icons for ease of recognition.

Font and Colour Changing

When working in Microsoft Word, ClaroRead's Font Button allows you to modify the font size, type, and colour of the whole document very easily.

You can:

- Increase or decrease the font size.
- Change the font to one of 3 popular fonts with one click. The fonts can be chosen in the new ClaroRead Advanced Settings Editor.
- Change the colour of the text of a whole document and change the background colour of your PC easily

Spoken words can be tracked using a custom colour selection. Any accessible text under the mouse can be spoken if needed

A unique feature allows ClaroRead PLUS to echo back words and phrases dictated into any text processor or email application using Dragon NaturallySpeaking 8 and 9 (any version).

Spacing

Text character, line and paragraph spacing using Microsoft Word menus requires some detailed knowledge. ClaroRead makes it simple to space out text, both in Word and on web pages using Internet Explorer 6 or 7. Pressing the Spacing Button when working in Word or Internet Explorer will help you:

- Expand spacing.
- Change line spacing.
- Changes the number of points (spaces) after the end of each paragraph.

Homophones and Tricky Words - Helping Choose the word

Homophones are words that are pronounced alike even if they differ in spelling or meaning, such as “pair” and “pear”.

ClaroRead Homophone features will:

- Mark in colour all the homophones and confusable words in a document. Using the new Advanced Settings Editor, you can also add additional tricky and confusable words.
- The Check Feature will list alternative words that sound the same, along with the meaning of each word.
- Mark homophones in colour as you type.

Check Word - a single button press

ClaroRead provides a single Check Button for use in Microsoft Word that combines a homophone dictionary, thesaurus, reference dictionary and spellchecker, making the checking of your text and documents easier and more comprehensive.

If a word is a homophone the Homophone Check Box will appear, along with meanings. If the word has alternative words with the same or similar meaning, the Meaning Check Box will appear. You can then drill down further to see the dictionary definition. You can SpellCheck individual words or the whole of your document at any point.

Scan paper & Convert PDF files into Word (ClaroRead PLUS only)

Powerful optical character recognition (OCR) technology means that any paper document or PDF file becomes accessible. Through the integration of Omnipage 15 OCR engine, textbooks, photocopies and handouts are easily converted into Word documents. The text can then be spoken out by ClaroRead or edited. PDF files can also be unlocked and edited, opening a wealth of material for accessibility to every student, regardless of the format.

This feature works using all scanners with TWAIN or WIA compatible scanners.

Word Prediction

ClaroRead contains a word prediction feature, enhanced in the 2007 version, which can be useful for certain computer users. ClaroRead uses a base prediction dictionary consisting of the most frequently used words in the English language. The dictionary learns as you type, and rejects words that don't pass the automatic spellcheck.

The Prediction List will automatically appear by your cursor during typing. Alternatively, you can dock the Prediction windows anywhere on the screen to use it as a reference.

ScreenRuler Reading Bar - included with ClaroRead PLUS

ClaroRead PLUS includes the separate program ScreenRuler. ScreenRuler is a separate application that works as a reading bar and strip magnifier. This allows part of the PC screen to be highlighted and magnified in a horizontal band.

This will assist anyone with viewing and concentrating on text or objects. It provides a 'strip' or 'ruler' across the screen which can magnify, change contrast, and 'grey' or 'dim' a background.

ClaroView - included with ClaroRead PLUS

Our new tinting product ClaroView is now included on the ClaroRead PLUS CD. ClaroView act as a coloured overlay for the PC.
