

DigiMemo L2 / A402

Digital Notepad with Memory

The DigiMemo is a stand-alone device with storage capability that digitally captures and stores everything you write or draw with ink on ordinary paper, without the use of computer and special paper. Then you can easily view, edit, organize and share your handwritten notes in Windows.

When connected to a PC, the DigiMemo offers an on-line writing function which can instantly synchronize your writing on the paper with the digital page in its software in Windows. It also is a USB tablet device in Windows.

1. Take Notes

Place any ordinary paper or notepad on the digital pad. Write on the paper with the digital inking pen.

The digital pad digitally records anything you write in its built-in storage device or an optional SD card in real time.

One page you write is stored as one digital page.

2. Connect to the PC

Connect the digital pad to your PC by an USB port.

3. Organize Your Notes

With its DigiMemo Manager software, you can easily view, edit and organize your digital pages in Windows. You also can use the on-line writing function which can instantly synchronize your writing on the paper with the digital page in its software. Save any digital pages you arbitrarily select as a book file (e-Book).

Share your notes with others via e-Mail.

4. Send via e-Mail

Share your notes with others via e-Mail.

Portable and Compact

- The digital pad can be effortlessly held in one hand or on the lap and easily operated while you are standing, sitting or reclining.
- An ultra-thin & light digital pen with a regular and replaceable ink cartridge.
- The size and weight of pen are almost like those of normal ball pen.
- Only about 660 g (1.45 lbs) for the digital pad and 13.8 g (0.03 lbs) for the digital pen.

Familiar and Natural

- Feel as comfortable as you normally write with a regular pen on paper.
- Immediately get both a digital record and a hardcopy duplicate of your handwritten notes even when you are on the move.
- Instantly & digitally record your notes, ideas, sketches, drawings and flowcharts, without scanning.
- Any ordinary paper or notepad up to Letter size (8.5" x 11.9" / 216 mm x 302 mm) can be applied for the model DigiMemo L2.
- Any ordinary paper or notepad up to A4 size (210 mm x 300 mm / 8.27" x 11.81") can be applied for the model DigiMemo A402.
- You cannot remember what you typed 10 years ago; however,

you will always remember what you wrote.

Powerful and Unforgettable

- Digitally capture & store everything you write with ink on ordinary paper in real time. No computer and special paper is needed.
- A stand-alone device with storage capability, that can be both the built-in 32 MB storage device in the digital pad and the expandable storage capacity by an optional Secure Digital (SD) memory card.
- The more you write on paper, the bigger file size of the digital page will be.
- The file size of the digital page for one A4 or Letter size paper with completely full handwritten notes is only about 400 KB.
- Manage up to 999 digital pages for each storage device.
- Capture your handwritten notes up to 0.55" (14 mm) thickness of paper (about 140 sheets of paper).
- Can continue to write into the digital page with contents stored.
- The time is shown on the display on the digital pad.
- When connected to a PC, it also is a USB tablet device in Windows.
- An excellent solution for form-filling application which needs a form hardcopy and digital filling data.

Efficient

- The battery of the digital inking pen can last approximately 14 months.
- With continuous use of the digital pad, four AAA alkaline batteries can last approximately 80 hours.
- 30 minutes automatic shutdown.

Simple and Manageable

With its DigiMemo Manager software, you can easily organize your digital pages in Windows. Share them with others via e-Mail.

- Save the digital pages you arbitrarily select as a book file (e-Book).
- Page thumbnails function.
- Easily import and remove your digital pages in a book file.
- Highlighting, annotating, editing (select, copy, move, erase...etc.), typing, viewing, changing color and drawing functions.

Convenient Pen Clip

Optional DigiMemo Handwriting Recognition

MyScript Notes for ACECAD

ACECAD DigiMemo Handwriting Recognition is the handy software that converts your handwritten notes from ACECAD DigiMemo into digital text for further use in the applications such as Microsoft Word, Outlook or Lotus Notes.

- Handwriting, shapes, tables and diagrams can be converted into print to be further processed in Microsoft Word. It respects the original layout of your handwritten notes.
- Easily operate. Your handwritten notes and converted notes are on the left and right side of the same window.
- Easily define a specific portion of your notes in which you can specify a different conversion mode or keep a freeform drawing, such as your signature.
- You can create a personal recognition profile so that the software can recognize your individual handwriting with even greater accuracy.
- Allow you to add words or auto replacements to your personal dictionary to enhance the recognition rate.
- The software converts English (US), English (UK), German, French, Italian, Dutch, Danish, Finnish, Swedish, Norwegian, Spanish, Portuguese, Russian, Japanese, Korean, Simplified Chinese, Traditional Chinese notes and recognizes capital letters, hand printed and cursive handwriting.
